

SB11 WINGED PARKING POST

WINGED PARKING POST

The SB.11W Parking Post has been manufactured with wings, in order to alleviate parking between posts. This parking post comes complete with an integral lock and two keys as standard. The lock is situated at the top of the post for ease of use and the construction is light and easy to handle. This bolt down version is easy to install and provides you with a great deterrent. The finish is powder coated a hi viz Yellow showing you have taken due care and attention to warn people you have a post in place. Ideal for protecting your parking space or stopping people turning round in your driveway. If you are buying more than one post, we can offer locks that are keyed alike as an optional extra.
