SB.2P PARKING BARRIER

PADLOCK FACILITY

The SB.2P Parking Barrier offers savings where UNIT cost is all important; it's winged design acts as a deterrent against parking in empty spaces and between.

Easy to operate the padlock facility (padlock not supplied) is at the top of the post and enables the barrier to lock in the up and down position. For easy installation the SB2 has four holes in the base to bolt down to ground surface. Powder coated with a high visibility yellow finish.

Measurements:

- Overall height, upright position 690mm
- Overall width 700mm
- Height in collapsed position only 60mm
