

SB.4 MANUAL RAISE ARM BARRIER

C/W PIVOT POST, END REST, PADLOCK, FIXINGS AND A CHOICE OF RED/WHITE OR YELLOW/BLACK BOOM

With the help of our locking sleeve and pogo stick end-rests our SB.4 barriers can be used together to fit larger road widths.

The SB.4 provides a low maintenance, cost-effective way of manually controlling access to unauthorised areas on a permanent or temporary basis. Durable and hard-working, this manual raise arm barrier has been manufactured for the last 32 years and comprises a robust and high quality pivot post, lockable end rest and aluminium boom.

The carefully designed pivot post has the strength to cover up to 8 metre road widths and still be easily operated by one person alone! Also combined with a stainless steel pivot bar and two heavy duty bearings this barrier is a great way of ensuring complete traffic management.
